

BUILDING AND HOUSING

MERCEDES BENZ SOUTH AFRICA (MBSA) ASRS BUILDING

CLIENT:

AE Industries (China)

LOCATION:

East London, Eastern Cape

COMMENCEMENT:

October 2017

COMPLETION:

expected April 2020

PROJECT OVERVIEW:

Axsys Projects' involvement in this project is through a joint venture with Stefanutti Stocks and Botani Construction, that operates as a subcontractor to Chinese company AE Industries.

The project sees the joint venture carry out the full design of the Automatic Storage Retrieval System (ASRS) building, based on the technical specification for facility elements. It also includes obtaining permits and local authority approvals, bulk earthworks, lateral support, external works, external and internal cladding, full MEP, external fire escapes and associated upgrades.

Conveyors and a connecting bridge links the new ASRS building into the J-Site logistics building (currently under construction) and into the F11 Assembly.
