

BUILDING AND HOUSING

MERCEDES BENZ SOUTH AFRICA (MBSA)

BUILDING 34 LOGISTICS BUILDING

CLIENT:

Mercedes Benz South Africa (MBSA)

LOCATION:

East London, Eastern Cape

COMMENCEMENT:

April 2018

COMPLETION:

December 2018

PROJECT OVERVIEW:

This project was awarded to a joint venture between Axsys Projects, Stefanutti Stocks and Botani Construction in April 2018.

The project was an extremely fast-track contract as client, MBSA, required partial occupation in October 2018, in order to start the racking. This milestone was achieved.

The contract involved the demolition of an existing building on the site (A Site) and the turnkey design and construction of a new 16 800m² Building 34 Logistics Building complete with infrastructure.

The scope of work included full design (based on MBSA's technical specification), obtaining the necessary permits and local authority approvals, demolition of the existing building on A-Site, bulk earthworks, lateral support, external works, structural steel, cladding, full MEP and commissioning.
